Window Blinds Measuring Instructions

You can mount your window blinds or window shades inside the window frame/casing or outside mounted to the wall above the window.

In order to mount the window blinds or window shades inside a window casing, make sure you have enough depth to allow room for the window blinds. Specifications for window blinds or window shades are given on the minimum depths to mount them.

Inside Mount Blinds or Shades

When mounting blinds inside the window casing or frame.

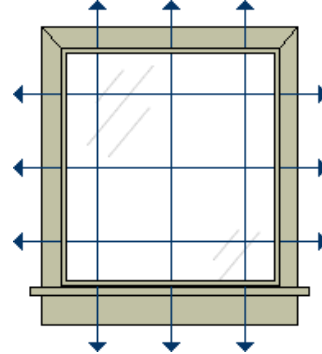

1. Simply measure the width and length in three different places as shown in the inside mount picture. *i.e. inside drywall to drywall or frame to frame.*
2. It is only necessary to give the smallest width and largest length to an 1/8 of an inch.
3. Enter exactly what your window frame measures.
Take NO deductions.
4. Ensure you have enough window depth. See individual products for details.

We will take proper deductions to fit the size window you specify.

Outside Mount Blinds or Shades

When mounting blinds outside the window casing.

1. Simply measure the width and length of the window in three places
2. Remember it is only necessary to give the measurement to an 1/8 of an inch.
3. **Horizontal Blinds** Add 3 inches to the width and length measurement.
Vertical Blinds Add a minimum of 4 inches to the width and 4" length measurement (2" if going to the floor)

We will take NO deductions on outside mount blinds or shades.

You MUST add for overlaps if desired.
